PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience in cloud infrastructure, CI/CD automation, and containerized application deployment through internships and real-world projects. Passionate about building scalable, reliable, and cloud-native solutions while continuously improving automation and operational efficiency.

TECHNICAL SKILLS

Cloud: AWS (EC2, S3, VPC, IAM, Lambda, DynamoDB, EKS, ECR, ELB, Auto Scaling, RDS), AWS CLI
DevOps: Docker, Kubernetes, Jenkins, Terraform, Ansible, Git, GitHub, GitOps, CI/CD, YAML, Generative AI
Monitoring: AWS CloudWatch, Prometheus, Grafana
OS/Scripting: Linux, Ubuntu, CentOS, Windows, Bash, Shell Scripting, Python, SSH
Networking: DNS, HTTP/HTTPS, VPC, Subnetting, Security Groups, Load Balancing, SSL/TLS
Databases: MySQL, PostgreSQL
Soft Skills: Problem Solving, Communication, Team Collaboration, Adaptability

EXPERIENCE

DevOps Intern

Jan 2026 – Jun 2026

PySpiders, Bangalore

- Designed and implemented CI/CD pipelines using Jenkins, GitHub, and Docker to automate application build, test, and deployment workflows.
- Deployed containerized applications on Kubernetes and managed Linux-based environments, shell scripting, and environment configuration.
- Monitored infrastructure and application performance using AWS CloudWatch, Grafana, and Prometheus by configuring dashboards and alerts.

AWS Cloud & DevOps Intern

May 2025 – Jul 2025

APSSDC (Remote)

- Developed a serverless AWS application using Lambda, DynamoDB, S3, IAM, AWS Cognito, and JWT authentication.
- Automated deployment workflows using AWS CLI and GitHub while implementing CloudWatch monitoring and metric-based alerting.

Cloud Engineering Intern

Jul 2024 – Aug 2024

ExcelR (Remote)

- Provisioned cloud infrastructure including virtual machines, VPCs, and security groups on AWS and Azure while supporting Linux administration and deployments.

PROJECTS

E-Commerce Microservices Deployment on AWS EKS

[\[GitHub\]](#)

Terraform, Docker, Kubernetes, Jenkins, AWS EKS, ECR, Helm, Prometheus, Grafana

- Provisioned AWS EKS infrastructure using Terraform and deployed 10+ containerized microservices to Kubernetes through AWS ECR.
- Built an end-to-end CI/CD pipeline using Jenkins and GitHub and integrated Prometheus with Grafana for cluster monitoring and observability.

MediGuide – Symptom Triage & Health Guidance Assistant

[\[GitHub\]](#)

AWS, Docker, Kubernetes, Jenkins, Terraform, GitOps, PostgreSQL, Prometheus, Grafana

- Automated cloud infrastructure provisioning and application deployment on AWS using Terraform, Jenkins, Docker, Kubernetes, and GitOps to build a scalable and reliable CI/CD pipeline.
- Implemented observability with Prometheus and Grafana, configured PostgreSQL for persistent storage, and integrated disaster recovery practices to improve application availability and resilience.

ACHIEVEMENTS

- 1st Place** – Amaravathi Quantum Valley Hackathon 2025 (Pre-Finals) for developing a Quantum Path Planning solution for delivery fleet optimization.
- \$100 Bug Bounty** – Received a reward for responsibly disclosing a Critical Subdomain Takeover vulnerability on hackathon.udemy.com.

EDUCATION

B.Tech in Computer Science Engineering (Lateral Entry)

Rayalaseema University

2023 – 2026

Percentage: 77%

Diploma in Biomedical Engineering

SGPR Government Polytechnic

2019 – 2023

Percentage: 76%
